

# Easy Fall Sensory Bags

## What is a Fall Sensory Bag?

This Easy Fall Sensory Bag is a great way to introduce the sights, colors, and feelings of the fall season to little learners. This activity is perfect for combining learning and developmental growth with play. When children are given the opportunity to engage in sensory play, they are able to learn from hands-on experience, which gives them the opportunity to think creatively, investigate new ideas, and participate in dramatic play.

### Required Materials:

Ziploc bags  
Cotton Pads  
Acetone  
Bottle of Clear Hair Gel  
Food Coloring  
Gold and/or Silver Colored Sequins  
Candy Corn Mix  
Fake Fall Leaves (Item #200124)  
Tape (Item #18562)

## Gather Your Materials

Begin by making sure you have everything you need to create your Easy Fall Sensory Bag. This includes your Ziploc bag, acetone, and some cotton pads to put the acetone on, clear hair gel, food coloring, sequins, candy corn mix, fake fall leaves, and some tape to ensure it is all sealed up!

## Fill Your Bag

Begin by laying out your Ziploc bag. Get your acetone and pour some onto your cotton pad. Use the cotton pad with the acetone to rub away any logos or lettering on the bag that could block you from seeing inside the bag. Once the bag is clear, get your bottle of clear hair gel and pour it into the bag. Next, get your food coloring (we recommend fall colors like red, orange, and yellow) and put it into the bag. Now you can seal the bag and mix the food coloring with the hair gel to make it more colorful throughout the bag. Next, open up the bag and pour in your sequins and your candy corn mix. Then, place in some fake leaves and seal the bag.

## Ready for Play

Lastly, be sure that your bag is fully sealed! Do this by making sure the bag is closed and taping the top of the bag completely shut as to help prevent its contents from leaking out during play. Then, you should be good to go and ready for a new easy and fun fall sensory activity!
