

Connect4Learning®: The Pre-K Curriculum

Distance Learning Guidance: Additional Purchase Price List

For teachers using *Connect4Learning*, the activities provided through social-media links and housed on the Connect4Learning website (<https://www.connect4learning.com/insights>) are offered free of charge and require minimal special materials to complete. These activities, requiring no additional purchases, will help families continue critical learning at home during significant disruptions that prevent children from going to school.

We recommend that programs purchase access to the Connect4Learning portal each year. The portal allows teachers remote access to the lessons in the unit guides, learning-center activities, formative assessments, and ongoing implementation-training opportunities. Renewing the portal also allows parents access to computerized educational math activities. The annual cost for portal access renewal is \$349.50 per classroom.

Extra sets of the Connect4Learning consumable materials (science journal, science-word stickers, Solutions Suitcase cutouts, and so on) also could be beneficial to send home with children. This product's item number is #88453, with a cost per set of \$169.95.
