PROGRAM OVERVIEW

HOW DO WE CALCULATE THE DOLLARS?

Thank you in participating in the **Tools for Schools** Program. Our program is only for Preschool through High Schools and does include Home School Associations. Please keep in mind that the Ingles' Tools for Schools calculation is based on the percentage of spending of all schools in the **Tools for School** program. **We provide the following information to help you understand why the key to this program is linking cards each year!**

At the end of each period, Ingles calculates the spending of participating linked customers for each school. The next step is to then calculate the total spending for all schools combined. Each school's spending is then calculated as a percentage of total spending for all participating schools. Each school then receives their percentage of that periods **TFS** Program's budget.

This means, the more cards you have linked, the more likely it is that you will receive more funds. Please keep in mind; you may call our Program Coordinator to verify how many customers you have linked to your school. Please see our section on ideas on how to increase your participation. Program Coordinator – Melissa Leavell
mleavell@ingles-markets.com

Remember, all parents and friends of your school must relink the card every year. Linking does not carry over from year to year.
